DigiGone™ Secure Mobile takes smart phone technology to the next evolutionary step. It allows clients to communicate with other **DigiGone™ Secure Mobile** and **DigiGone™ Key** users through fully encrypted means. **DigiGone™ Secure Mobile** is loaded as a suite of applications on an SD Flash Drive that is inserted into the Flash port on any smart phone running Windows Mobile 5/6.

DigiGone™ Secure Mobile capabilities:

- Encrypted Video and Voice over Internet Protocol (VoIP) between users of **DigiGone™ Secure Mobile**, as well as **DigiGone™ Executive and Sat-Chat**, using 256-bit AES encryption (Mobile to Mobile and Mobile to PC)
- Encrypted Instant Messaging (IM) between users of **DigiGone™ Secure Mobile**, as well as **DigiGone™ Executive and Sat-Chat**, using 256-bit AES encryption (Mobile to Mobile and Mobile to PC)
- Encrypted transmission of files between users of **DigiGone™ Secure Mobile**, as well as **DigiGone™ Executive and Sat-Chat**, using 256-bit AES encryption (Mobile to Mobile and Mobile to PC)
- Store encrypted or unencrypted files on Flash Drive or internally on the phone

DigiGone™ Secure Mobile is fully compatible with the **DigiGone™ Executive and Sat-Chat**, and like the Key, it allows clients to operate their own network of VoIP/IM servers.

Hold **Secure Video Teleconferences** with multiple people, all from the palm of your hand!
